

Release Notes (What's New) For

V 4.0

April, 2007 - Registry Products

FINAL

MODULE	HD #	DESCRIPTION
IWeb Core	IWEB-1003	<p>Lot Numbers</p> <p>The "Lot Number Search Results" now persist across requests within the same session, until search criteria are changed.</p>
IWeb Core	IWEB-1010	<p>Personal Settings</p> <p>Formatting of Area Code Personal Setting now displays correctly on the "Patient Demographics Edit" page.</p>
IWeb Core	IWEB-1016	<p>Vaccinations</p> <p>Added logic to the "Vaccination Add" screen which will display a warning message to the user saying that there is an active deferral for the vaccine they are trying to administer. The user will not be allowed to enter the deferred vaccine; thus, vaccinations within deferral periods are rejected.</p>
IWeb Core	IWEB-1097	<p>Vaccinations</p> <p>Added an optional "footnote and symbol" for the DTaP-3 to DTaP-4 interval to display on the "Vaccination View/Edit" screen. The "footnote and associated symbol (!)" can be enabled/disabled under Administration; Properties; Vaccination Properties.</p>
IWeb Core	IWEB-1098	<p>Patients</p> <p>Changed the logic for displaying guardian information so that if a non-owning IRMS is viewing the patient and the public data is null for guardian, the private data will be displayed.</p>
IWeb Core	IWEB-1100	<p>Deduplication</p>

8/24/2007

Release Notes (What's New) For

V 4.0

April, 2007 - Registry Products

FINAL

MODULE	HD #	DESCRIPTION
		<p>STC recommends setting the DEDUP_SIMPLE_MASTERS_MODE to ALL to eliminate the need for the second review. This can be changed by following the instructions in the database upgrade.</p> <p>The current default setting is AUTOONLY which means that only merges found by the automatic procedures are merged.</p> <p>Dedup Simple Masters may occur when an incoming record appears to be a match to more than 1 master record. The current setting moves the records from Manual Merge to the Dedup Simple Masters. Not having the DEDUP_SIMPLE_MASTERS_MODE set to ALL is requiring the user to review the records a second time -- once for regular manual deduplication of the incoming record and a second review for the dedup simple masters.</p>
IWeb Core	IWEB-1121	<p>Vaccinations</p> <p>Resolved problem on "Add Vaccinations" with database connections not being closed properly when other errors occurred.</p>
IWeb Core	IWEB-1122	<p>HEDIS</p> <p>HEDIS import now sets the IS_HEDIS flag correctly in the database when the sample is loaded.</p>
IWeb Core	IWEB-1131 / HDLA-98	<p>Reports</p> <p>Fixed bug with the "Vaccine Accountability Log" report that displayed Wyoming report headers.</p>
IWeb Core	IWEB-186	<p>CASA</p> <p>Added support for Version 2.0 of the CoCASA template. This version includes support for</p>

Release Notes (What's New) For

V 4.0

April, 2007 - Registry Products

FINAL

MODULE	HD #	DESCRIPTION
		"History of Chicken Pox."
IWeb Core	IWEB-285	<p>Lot Numbers</p> <p>Added a configurable property to inactivate the option of "administered to client who chose not to be in the registry" on both the "Reconciliation" screen and "Lot Number" edit screen.</p>
IWeb Core	IWEB-344	<p>Deduplication</p> <p>Improved error handling in the Administration – Manual Deduplication" screen.</p>
IWeb Core	IWEB-374	<p>Oracle 10gAS</p> <p>IWeb Application tested and verified in Oracle 10gAS.</p>
IWeb Core	IWEB-409	<p>Patients</p> <p>Added the ability to configure required fields at the IRMS level for the "Patient Demographics" screen. The following fields can be set as required:</p> <ul style="list-style-type: none"> • Patient Address • Patient City • Patient State • Patient Zip Code • Patient Gender
IWeb Core	IWEB-444	<p>Patients</p> <p>Added a new alphanumeric field, "Medicaid Provider #" to the "Patient Demographics" Detail and Edit screens. This field will be populated by Medicaid batch imports as well as by provider data entry.</p>

Release Notes (What's New) For

V 4.0

April, 2007 - Registry Products

FINAL

MODULE	HD #	DESCRIPTION
IWeb Core	IWEB-51	<p>Forecasting</p> <p>A new link "Forecast Preferences" was added (under Administration, Immunization Schedule Settings), to add/edit/delete a dose preference.</p>
IWeb Core	IWEB-614	<p>Reports</p> <p>Modified the generation of the "Multiple User Report" with two new additional parameters ("Access Level" and "County/Parish").</p>
IWeb Core	IWEB-674 / HDAZ-27	<p>HL7</p> <p>Fixed bug with HL7 not processing RXR segment correctly.</p>
IWeb Core	IWEB-708 / HDIN-16	<p>Reports</p> <p>Added "Ineligible" as an option on the VFC Code drop-down (only displays when VFC Eligibility is set as required) on the "Patient Detail Report."</p>
IWeb Core	IWEB-716	<p>HL7</p> <p>Added the ability for doctors' offices to modify the "HL7 Upload" based on a permission that is set by the Registry Client user.</p>
IWeb Core	IWEB-736	<p>CASA</p> <p>Changed the default export from WinCASA to CoCASA.</p>
IWeb Core	IWEB-737 / HDAZ-43	<p>Reports</p> <p>Added HPV to the "Vaccine Accountability Report."</p>

Release Notes (What's New) For

V 4.0

April, 2007 - Registry Products

FINAL

MODULE	HD #	DESCRIPTION
IWeb Core	IWEB-744 / HDAZ-45	CASA Fixed issue with formatting of CoCASA export file.
IWeb Core	IWEB-777 / HDAZ-46	HL7 Fixed bug with HL7 not indicating the originating Provider Site.
IWeb Core	IWEB-781 / HDAZ-48	Vaccinations Fixed issue with option to refrain from taking ownership on the "Vaccination View/Add" screen not working.
IWeb Core	IWEB-815 / HDAZ-3	Vaccinations Added a new Property to change the behavior of VFC Eligibility on "Administered Vaccinations" so that it does not depend on the eligibility of the lot.
IWeb Core	IWEB-876	DTT Enhanced the DTT Import Contraindication to update the LAST_USER_TO_UPDATE field in the database.
IWeb Core	IWEB-892 / HDAZ-28	Deduplication Added negation logic to the deduplication algorithm to prevent "special" baby from going to manual deduplication for obvious non-matches.
IWeb Core	IWEB-909	Reports The Vaccine Administered Report no longer receives a "Java Script" error when running it multiple times in a row in IE7.

Release Notes (What's New) For

V 4.0

April, 2007 - Registry Products

FINAL

MODULE	HD #	DESCRIPTION
IWeb Core	IWEB-911	<p>Reports</p> <p>Modified the "Vaccination Data Quality" report to display 'DTaP >= 7 years' regardless of a specified vaccination date range.</p>
IWeb Core	IWEB-912	<p>Reports</p> <p>Corrected the "Usage Tracking Report" to show a 60-day usage.</p>
IWeb Core	IWEB-920	<p>Login</p> <p>Modified the application so that the cursor positions in the "username" field on the "Login" screen.</p>
IWeb Core	IWEB-929 / HDLA-82	<p>Reminder / Recall</p> <p>Modified queries to improve performance when running against large datasets.</p>
IWeb Core	IWEB-943	<p>DTT</p> <p>Added the ability to create new DTT profiles that include Patient School and Grade—this ability will also import and/or export Patient School and Grade.</p>
IWeb Core	<p>IWEB-948 / HDAZ-70</p> <p>IWEB-1087 / HDAZ-70</p>	<p>CASA</p> <p>Suppressed commas that are part of the patient first name, middle name, or last name in the CASA Export. This change prevents the comma from being used as a delimiter in the export file.</p> <p>Corrected the VFC Eligible and MOGE code conversions.</p>

Release Notes (What's New) For

V 4.0

April, 2007 - Registry Products

FINAL

MODULE	HD #	DESCRIPTION
IWeb Core	IWEB-950 / HDAZ-69	HL7 Fixed bug with HL7 reciprocal file sending vaccination records outside query range.
IWeb Core	IWEB-977	Forecasting Modified forecast to account for Tdap booster doses in off-schedule patients > 7 years of age.
IWeb Core	IWEB-977 / HDLA-87	Forecasting Modified forecast to reset recommended date equal to minimum date in cases where the recommended date is after the maximum date the patient is eligible for the shot, but the patient would have been eligible at the minimum date.
IWeb Core	IWEB-983 / HDWA-127	Facilities County View will now show only active facilities.
IWeb Core	IWEB-984 / HDLA-91	Deduplication Resolved an issue where the deduplication logic identified three records that could be merged and the user selected to merge in Manual Deduplication, the records were still requiring a second manual review.
IWeb Core	IWEB-987	Schools The "Search School District Name" will now auto-complete in the "Create School District" page.
IWeb Core & Mass Immunizations	IWEB-915	Date Entry Modified the application when a user inputs a two-digit year, it will format to 90 years ago to 10
